

# Analysis of overseas market for new energy storage

Which countries have the most energy storage installations?

China accounts for over 50% of the annual build in gigawatts, followed by the US at 14%. Energy storage additions in these two markets remain strong for now although recent policy changes slow new solar and wind in both markets. Energy storage installations globally will keep gaining momentum over the next decade as other markets pick up pace.

Is China entering a new era of energy storage demand?

Mainland China accounts for most of the global energy storage demand, driven in the near term by regional requirements for new utility-scale wind and solar projects to include energy storage capacity. However, the Chinese market is entering an era of change.

Which region has the most energy storage devices in 2022?

The Asia Pacific was the largest segment in 2022 and accounted for more than 46.87% of the overall market share, owing to the presence of fast-growing economies such as China and India. Energy storage devices are critical in applications such as UPS and data centers because this region is prone to frequent power outages.

How big is the energy storage industry?

Energy storage systems (ESS) in the U.S. was 27.57 GW in 2022 and is expected to reach 67.01 GW by 2030. The market is estimated to grow at a CAGR of 12.4% over the forecast period. The size of the energy storage industry in the U.S. will be driven by rising electrical applications and the adoption of rigorous energy efficiency standards.

The global energy storage systems market recorded a demand was 222.79 GW in 2022 and is expected to reach 512.41 GW by 2030, growing at a CAGR of 11.6% from 2023 to 2030. Growing demand for ...

The global energy storage market added 175.4 GWh of installed capacity in 2024, with the three major regional markets--China, the Americas, and Europe--continuing to account for over ...

The new energy storage installations in China, the U.S., and Europe will account for 86% of the global total, continuing to lead the global demand for energy storage. In 2025, large-scale ...

The Energy Storage Market worth 0.54 terawatt in 2026 is growing at a CAGR of 23.05% to reach 1.52 terawatt by 2031. Contemporary Ampere Technology Co. Ltd. (CATL), Tesla Inc., LG ...

Global energy storage additions are on track to set another record in 2025 with the two largest markets - China and US - overcoming adverse policy shifts and tariff turmoil. Annual ...

Regional dynamics demonstrate energy storage markets reaching maturity. Explore this evolution and our analysis of the key global themes to watch in the year ahead.
