

Basseterre solar Glass Procurement Project

The \$70 million microgrid project is being built by Leclanche, one of the world's leading energy storage companies, which will serve as the prime engineering, procurement, and construction contractor.

Basseterre, St. Kitts (18th December 2025) -- The St. Kitts Electricity Company Ltd (SKELEC) plans to launch a competitive procurement for a 50MW solar PV plant with an integrated ...

The project, set on government-provided land in the Basseterre Valley, will include a 35.6 MW solar energy plant along with a 44.2 MWh battery storage facility.

The 35.6 MW solar energy plant and 44.2 MWh battery storage facility will be built on government-provided land in the Basseterre Valley, adjacent to the City of Basseterre and the current SKELEC ...

Total project costs varied from \$722-\$1,383/kWh; some of these variations could be due to chemistry, some due to C& C costs, and others due to project size. Lead-acid batteries had a much tighter cost ...

The project consists of a fully integrated 35.7 MW solar photovoltaic system (solar field) and a 14.8 MW / 45.7 MWh lithium-ion battery energy storage system (BESS) utilizing Leclanchés proprietary energy ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal operating ...

The recently commissioned new energy storage plant in Basseterre sits on a 12-acre site northwest of the city, strategically positioned to serve St. Kitts and Nevis" growing energy demands.

During his Budget Address 2020 Thursday,Prime Minister, Dr. the Honourable Timothy Harris, said the government of St. Kitts and Nevis, in collaboration with The St. Kitts Electricity Company Limited ...
