

Can a home 8500w inverter withstand this

May 12, 2025 · Final Thoughts A home battery inverter can power your entire house, provided it's properly sized, paired with adequate battery storage, and managed by a smart control system.

For homeowners, the primary appeal of the Champion 8500W dual fuel inverter generator lies in its ability to support critical household systems during power outages.

For home back up with a split phase panel it seems to be a nice option. However, having the ability to run 120v only would drop the balancing question and allow larger 120v loads to run off of it.

During unexpected power outages, having this generator on hand can ensure essential appliances continue to run. It can handle refrigerators, lights, and even medical devices.
