

Cost of Steffes heating units

Are the current production head units listed as being compatible with your old outdoor unit? I tend to agree with your HVAC tech that by the time you buy a new coil and get it installed the ...

In our 1980's house we have three rooms upstairs which have the classic baseboard electric heat units. Is there a more efficient but similar unit we can replace them with? The rest of the ...

For GBA readers who are confused by Mark's question, here's what he left out: 1. "ETS" stands for "electric thermal storage unit"; 2. Steffes Corp. is a manufacturer of electric thermal ...

To get 41,744,775 BTU of heat from an electric resistance heater requires 12,240 kWh of electricity. If you buy all your electricity at night, that much electricity will cost you \$734. That's less ...

Even cheap hydronic is not free, you are still essentially installing two complete heating systems. There is very little cost between installing AC only or a heat pump, just a bit more hardware ...

The Steffes ETS system converts this off-peak electricity to heat and stores it in heating elements contained within high-density ceramic bricks. With the Steffes ETS system's ability to store vast ...

Together, ETS and heat pumps are the most efficient and lowest cost of operation heating and cooling system option available. As outside ...

The cost of the pump is a small percentage of the cost of a solar thermal system -- and in general, more efficient pumps cost more to manufacture than less efficient pumps. To increase the ...

At a fraction of the cost, do window-mounted AC units make more sense than expensive central air? Here are some considerations.

I could get the equivalent cooling tonnage as my existing two Bosch units by buying six Medea units and spreading them around my house -- in both cases I'd have 6 tons of cooling. Cost ...

Depending on cost of your propane and electricity, a mini split is typically cheaper to operate (it is around me), plus you don't have to pay for the cost of installing a propane tank. A hyper ...

\$2,280.00 LREC will size and price a Steffes system for your needs. Pricing.

Steffes heating systems can save you money because the heat stored is purchased at a lower off-peak cost. These reduced rates provide substantial savings on your energy bill and much more.
