

Costa Rica outdoor power supply is usable

What type of power outlet is used in Costa Rica?

Costa Rica uses power outlets and plugs of types A & B. Type A outlets are mostly used in the US, Canada, Mexico, Central America, China, and Japan. Type B outlets are similar to type A, but with an extra pin for grounding.

Can solar power improve Costa Rica's energy security?

Solar energy, though currently a minor player, offers untapped potential to enhance Costa Rica's energy security. The country's tropical climate ensures consistent sunlight, making solar PV systems ideal for both utility-scale and distributed generation.

Can solar power diversify the energy mix in Costa Rica?

While hydroelectric power dominates the energy mix at approximately 80% of electricity production, solar energy, though currently a smaller contributor, holds significant potential to diversify and stabilize the grid. This paper investigates Costa Rica's renewable energy journey, emphasizing solar power's evolving role.

What type of power plug do I need for Costa Rica?

In Costa Rica, you will find type A and B power sockets. The standard voltage is 120 V at a frequency of 60 Hz. Therefore, you need a power plug (travel) adapter for your trip to Costa Rica.
