In 1876, William Grylls Adams and his student Richard Day discovered that when Selenium (Se) was exposed to light, it produced electricity. While it wasn't perfect, it was the first step towards the energy revolution -- ...

In this article, we break down this vast history of solar power into 12 significant milestones. We discuss the most important scientific breakthroughs in solar technology, but we also leave a little room to share a few ...

Modern solar energy harnesses the same fundamental principles discovered over a century ago. Solar panels, composed of photovoltaic (PV) cells, convert sunlight directly into electricity.

Watch Discovery Channel TV Shows | discovery+ | Watch HGTV, Food Network, TLC, ID and more plus exclusive originals, all in one place.

It was during this period that the fundamental principles of solar energy were first uncovered, setting the stage for centuries of innovation. These early investigations, though limited by contemporary ...

Exploring the origins of modern solar power reveals the pivotal discovery of the photovoltaic effect by French physicist Alexandre Edmond Becquerel in 1839. This groundbreaking finding laid the foundation ...

Solar power was first discovered by French physicist Edmond Becquerel in 1839 at the young age of 19. At the time, Becquerel was experimenting in his father's lab when he observed the photovoltaic effect, a process ...

Explore the fascinating journey of solar energy from its ancient beginnings to its modern applications and future potential. Discover how solar energy has evolved over time.

Already have a discovery+ account? Great! Here's how to sign in. Choose the device you're using: Phone or tablet Here's how to sign in to the discovery+ app: Open discovery+ and choose Sig...

Solar technology isn't new. Its history spans from the 7th Century B.C. to today. We started out concentrating the sun's heat with glass and mirrors to light fires. Today, we have everything from solar-powered buildings to

Discovery of the principle of solar power generation

...

Solar energy's development commenced in 1839 when French physicist Alexander Edmond Becquerel (1820-1891) conducted research that led to the discovery of the "photovoltaic (PV) effect."

Long before the first Earth Day was celebrated on April 22, 1970, generating awareness about the environment and support for environmental protection, scientists were making the first discoveries...
