

How does Cape Town support decarbonisation of electricity?

ties and the City of Cape Town's Energy Strategy THE KEY AREAS OF ALIGNMENT INCLUDE:  
Decarbonisation of electricity is evidenced through the City of Cape Town's delivery and support of new renewable energy sources (whether owned or procured by the City or from the private sector) to reduce the local grid emissions factor. This is

Is Cape Town a good place to invest in energy projects?

The City of Cape Town municipality (CCT) is exemplary in this regard as it has managed to consistently secure funding to supplement the municipal fiscus in the form of grants, loans, and concessional finance for energy projects, through institutions like IFC, KfW, AfD, and the national Department of Electricity and Energy (DEE)\* to mention a few.

What is Cape Town's energy strategy?

TY OF CAPE TOWN FOREWORD FROM THE EXECUTIVE MAYOR With this Energy Strategy, Cape Town is charting the long-term path to 2050, as we make the great transition from centralised supply of unreliable, costly and fossil fuel-based Eskom energy, to an increasingly decentralised supply of reliable, cost-effective, carbo

Do all Cape Town residents have access to energy?

oss all of Cape Town. UNDERSTANDING ENERGY POVERTY Access to energy is an essential component of contemporary urban life. However, due to a range of socio-economic conditions, not all residents have access to the energy required to meet their daily n

The Cape Town CCID has launched its new public campaign with step-by-step guide to saving electricity in Cape Town.

Abstract This study examines a set of energy policy interventions, which can make a major contribution to sustainable development for the City of Cape Town - economically, ...

G Heinrich<sup>3</sup>. Where Cape Town gets its energy supply from<sup>5</sup>. Forward-looking energy policies<sup>5.1</sup> Energy savings Many of the policies outlined above improve efficiency.<sup>7</sup> Using less energy to deliver the same level of service means energy savings. Since energy costs money, these savings translate into cost savings as well - which we report later in the cost comparison. The annual energy savings which the different policies can achieve are reported in Table 8. This table reports in common units (TJ = 10<sup>12</sup> J) or 3.6 million kWh, for those more familiar with electricity units. Common units enable a direct comparison across policies using different fuels - e.g. the impact of saving litres of petrol to reducing electricity consumption.<sup>5.2</sup> Local air pollutants Having considered the energy savings, we turn to environmental implications of the policies. Energy use has particular implications for global and local air pollutants. Of all the local pollutants, we consider sulphur dioxide (SO<sub>2</sub>), a contributor to acid rain, and total suspended particulates (TSP), which contribute to Cape Town's "brown haze" (Dutkiewitz & De Villiers 1995; Wicking-Baird et al. 1997). The major sectors that reduce local pollutants are those that use fuels directly. By contrast, electricity is clean at

the point of use, but very large quantities of coal are burned elsewhere - and produce global pollutants (see the next section). Sectors relying mainly on electricity, such as office and government buildings, produce little local pollution. Table 10 shows potential reductions by key policy in the transport and industry sectors, both of which use significant amounts of non-electric fuels. A few policies also reduce total suspended particulates (including particulates of different size, PM-10, PM-5 and PM-2.5), notably the modal shift in transport. Smaller reductions are seen in Table 11 for installing ceilings in the residential sector and the efficiency improvements in industry partment of Chemical Engineering, University of Cape Town Abstract This study examines a set of energy policy interventions, which can make a major contribution to sustainable development for the City of Cape Town - economically, environmentally and socially. Major energy savings can be made from modal shifts in the transport sector, and with e...See more on open.uct.ac
