

Generator wind deflector

Quiet your portable generator with the #1 selling generator silencer made in America.

Here's how to quiet a generator: Place your generator on a soft location (like grass), use sound deflectors, use a water muffler, or reposition the generator location.

There are several ways to solve for this, from framed covers to customized boxes to partial enclosures you can build yourself. Ahead, we dive into the pros and cons of each option.

Sound deflectors are most effective if your generator is placed in a shed or an outhouse. With sound deflectors installed, the sound that reaches you is greatly minimized. As a result, it'll also ...
