

Guyana Large Energy Storage Project

After a period of dedicated efforts, on January 27, 2025, the Wakenaam Diesel and BESS Storage Project was officially completed.

From flood-resistant battery racks to smart energy management software, Guyana's emergency power infrastructure is entering a new era. The right storage solutions don't just keep lights on - they keep ...

Summary: Guyana is embracing solar energy and advanced storage solutions to build a resilient power grid. This article explores how photovoltaic (PV) technology paired with energy storage systems ...

Guyana's project isn't just about storing energy--it's about harnessing chaos. With 87% forest cover and rivers that behave like moody teenagers (unpredictable and full of energy), the ...

This project is Guyana's largest hybrid solar-plus-storage power facility and is expected to provide greater grid reliability for thousands of residents in the Essequibo region.

The BESS forms a critical part of the power plant's emergency support system and is engineered to ensure uninterrupted energy delivery in the event of [...]

June 23, 2022: Guyana is to develop eight utility-scale solar and battery storage projects in the South American country with investment financing worth around \$83 million, the Inter ...

As a key component of Guyana's landmark Gas-to-Energy (GtE) initiative, the BESS will enhance the project's efficiency and reliability; helping to stabilize the national grid, reduce carbon ...

More than 100 miles offshore Guyana, three of the world's largest, best-in-class floating production storage and offloading (FPSO) vessels - the Liza Unity, the Liza Destiny and Prosperity - ...

As Guyana positions itself as a Caribbean energy leader, this EPC project demonstrates how electrochemical storage can transform national grids while supporting sustainable development goals.
