

High-precision battery cabinet testing system

High-precision system designed for repeated and reliable testing of secondary battery modules and packs; ideal for incoming and outgoing inspections as well as capacity, performance, production, and ...

With the ability to discharge batteries down to 6V and a rapid current response time of 10ms, this 6U cabinet delivers exceptional performance for a wide range of battery testing applications, from ...

The Precision Battery Test System is essential for battery scientists and engineers. We ensure the necessary accuracy and efficiency to streamline the battery test process.

Whether you need a high-power battery test stand, motor or inverter test bench, or completely custom industrial test system, Ampernext can deliver a solution built to your exact specifications.

With its outstanding performance and precision, our BMS test equipment can be used for various applications in different industries and can support you in validating the functionality of cutting-edge ...

The ESS Battery Cell Performance Testing Cabinet is a high-precision system designed to evaluate the electrical and thermal performance of energy storage system (ESS) battery cells.

With integrated chambers, HPS offers a turn-key solution with state-of-the-art technology for battery research, ensuring unmatched accuracy and precision. PDBT is designed for battery parallel test for ...

The Semco SI BCDS 100V 120A 4CH-Repower-2020 is a high-power, precision test system designed for life aging testing, performance evaluation and quality control of lithium-ion, lead-acid, NiCd and ...

Our test solutions are designed to test battery cells, modules, packs and battery management systems for e-mobility, mobile, industrial, and stationary use.

High-precision battery cabinet testing system
