

# Inner Mongolia uses wind power to generate electricity

The Inner Mongolia autonomous region is leveraging its abundant wind and solar power potential to revolutionize its energy landscape, transforming itself into a hub for clean, sustainable ...

Inner Mongolia has launched a groundbreaking wind-solar power cluster in the Kubuqi Desert, a significant milestone for China's renewable energy efforts. Developed by the China Three ...

Photo taken on Feb. 3, 2026 shows towering wind turbines standing amid snow-covered mountains and grasslands at the Huitengliang Wind Power Farm in Xilinhot City, Xilingol League, north China's Inner ...

However, Inner Mongolia also possesses vast potential for solar and wind energy. Its expansive deserts and sandy lands provide ideal locations for solar and onshore wind installations.

Located in Ordos City, Inner Mongolia, a region renowned for its extensive wind and solar energy potential, the project is strategically positioned to maximize renewable energy generation.

Recently, the 1.5 million-kilowatt wind storage base project of Inner Mongolia Energy Urad Zhongqi has achieved the first unit connected to the grid for power generation.

Inner Mongolia Wind Farm Phase I Project is to utilize wind resources for electricity generation through the construction of a wind farm. The electricity generated from the project will be sold to West Inner ...

Inner Mongolia possesses abundant new energy resources, with wind energy potential of 1.46 billion kw, accounting for approximately 57 percent of the national figure. Its solar potential ...

China's first and largest onshore wind farm to deploy 10 megawatt turbines at scale officially entered commercial operation in North China's Inner Mongolia Autonomous Region on ...
