

# Lease of solar panels on roof

What is a solar roof lease?

The lease typically includes maintenance and monitoring of the system by the solar company. One example of a Solar Roof Lease is where the homeowner pays a fixed monthly amount over a set period, usually around 20 years, for the use of the solar panels. This can help homeowners save on their electricity bills while reducing their carbon footprint.

Can you lease solar panels?

Leasing solar panels is like leasing a car: you don't own the solar panels, but you do get to use the solar energy they produce for a fixed monthly payment to the solar company. Solar lease payments are typically designed to be lower than your pre-solar electricity bill, so you'll still see savings every month.

Should you lease or buy a solar roof?

**Lower Upfront Costs:** One of the key financial advantages of leasing a solar roof is the ability to access solar energy without the need for a large upfront investment. If homeowners choose to lease instead of buy, they can avoid the high costs of installing and buying a solar panel system.

Does a solar roof lease include maintenance & monitoring?

**Maintenance and Monitoring Included:** Many solar roof lease agreements include maintenance and monitoring services provided by the solar company. This means that homeowners can benefit from professional upkeep of the solar panel system without incurring additional costs.
