

Manila Power Station Energy Storage Project

What is a pumped-storage hydroelectric project in the Philippines?

Share this story! Ultra bilyonaryo Enrique K. Razon Jr.'s Prime Infrastructure Capital Inc. is pushing forward with two major pumped-storage hydroelectric projects--the 600-megawatt (MW) Wawa and the 1,400MW Pakil facilities--aimed at strengthening the Philippines' energy security and renewable energy capacity.

Where in the Philippines will a solar power plant be located?

The project, which is strategically located on the Philippines' main island of Luzon, about 100km from Manila, will combine 3.5GWp of solar PV capacity with 4.5GWh of battery energy storage system (BESS).

What is a GW power plant in the Philippines?

Strategically located in the Philippines, the comprehensive development is designed to harness substantial renewable energy resources, boasting a total planned capacity of 3.5 gigawatts (GW) of photovoltaic (PV) power and 4.5 gigawatt-hours (GWh) of energy storage.

Why is SMEC building infrastructure in the Philippines?

"In delivering this project, we're not just building infrastructure - we're helping shape the future of clean energy in the Philippines," said Gabriel Zamudio Jr., SMEC Vice President and Regional Lead, Dams & Hydropower - Philippines.

The Department of Energy (DOE) of the Philippines endorsed 17 power generation projects to the National Grid Corporation of the Philippines (NGCP) in June 2025, highlighting the ...

Ultra bilyonaryo Enrique K. Razon Jr.'s Prime Infrastructure Capital Inc. is pushing forward with two major pumped-storage hydroelectric projects--the 600-megawatt (MW) Wawa and ...

On November 18, a consortium comprising China Energy International Engineering (Energy China) and the Guangdong Electric Power Design Institute inked an EPC (Engineering, ...

Battery Energy Storage System As a trailblazer in battery energy storage technology in the Philippines, San Miguel Global Power is able to significantly support the use of renewable energy sources in the ...

Aboitiz Power commits P1.2B to a pioneering hybrid BESS project in the Philippines. This model, integrating battery storage into thermal plants, is a blueprint for climate-resilient energy and ...

The Manila Wind Power Project energy storage landscape offers tremendous opportunities for businesses ready to adopt smart energy solutions. By combining proven technologies with innovative ...

That's exactly where Philippines pumped storage power stations come into play. As the country races toward its 35% renewable energy target by 2030, these facilities are becoming the ...

Manila Power Station Energy Storage Project

The power generation arm of the Philippines' largest private electric distribution provider, Manila Electric Company (Meralco), is developing its second large-scale battery storage project. ...

The Philippines is showing real purpose on the energy transition and no project represents this more than the Terra Solar Project. It will co-locate solar PV with battery storage on a scale the ...

Engineering consultancy SMEC has been appointed as Owner's Engineer for Phase 2 of the 600MW Wawa pumped storage hydropower project in Rizal Province, Philippines. The project, ...
