

Nanpeng Island wind blade power generation

NANPENG Island project is the company's first offshore project and the largest single wind power project. The grid connected power generation of the project can improve the company's ...

The 300 MW Yangjiang Nanpeng offshore wind farm in China, developed by China Energy Conservation and Environmental Protection Group (CECEP), has been fully connected to the ...

This project is part of China's robust expansion in offshore wind energy, with mainland China being the largest offshore wind power producer in the Asia-Pacific region.

On November 28, as the impeller of the 55th wind turbine slowly started to operate, all the wind turbines of CECEP's 300MW offshore wind power project on Nanpeng Island in Yangjiang City, ...

On December 16, 2020, with the connection of the last unit to the grid, China General Nuclear Power Group's 400,000-kilowatt offshore wind power project in Nanpeng Island, Yangjiang, Guangdong, ...

The 300-MW Offshore Wind Power Project of Nanpeng Island in Yangjiang, Guangdong Province The 300-MW Offshore Wind Power Project of Nanpeng Island in Yangjiang, Guangdong Province

The grid-connected power generation of the project has further improved the company's construction capacity and operation and maintenance capacity in the field of offshore wind power.

A 300-megawatt offshore wind power project on Nanpeng Island, Guangdong province, has seen all its wind turbines connect to the grid for power generation recently.

The wind turbines in the Guangdong Nanpeng Island CGN Offshore Wind Farm Phase II are installed on fixed foundations. The project generates 1,015,000MWh electricity thereby offsetting 828,800t of ...
