

National construction of hydrogen energy base stations

National Grid is proud to support this work. Further research and development will be crucial to unlocking the true potential of hydrogen as a clean source of energy that can serve multiple ...

Independent analysis of advanced hydrogen and fuel cell technologies operating in real-world conditions for status, benchmarking, technology readiness, value proposition, and research needs.

The Biden administration has published its National Zero ...

In this project, we are continuing the previous Reference Station efforts by developing realistic potential layouts of gaseous and liquid hydrogen stations (both greenfield and collocated with gasoline) in ...

Develop hydrogen infrastructure technologies, including hydrogen delivery, storage, and dispensing, with the aim of meeting overall cost targets for delivered and dispensed hydrogen.

Today, President Biden and Energy Secretary Jennifer Granholm are announcing seven regional clean hydrogen hubs that were selected to receive \$7 billion in Bipartisan Infrastructure Law ...

Learn How DOE and Other Federal Agencies are Implementing the National Hydrogen Strategy

The U.S. Department of Energy's Hydrogen and Fuel Cell Technologies Office (HFTO) leads research, development, and demonstra-tion (RD& D) of hydrogen and fuel cell technologies across ...

Visit the Alternative Fuels Data Center to find hydrogen fueling station locations in the United States. The following publications provide more information about NLR's hydrogen fueling ...

The Biden administration has published its National Zero-Emission Freight Corridor Strategy to support the decarbonisation of medium- and heavy-duty trucks -- with an eye toward ...

The U.S. Department of Energy (DOE) has just announced nearly \$62 million for 20 projects across 15 states to accelerate the research, development, demonstration, and deployment ...
