

Nordic energy storage BMS solution

We design customized storage systems to match your energy demands and infrastructure. Our team ensures compliance with industry standards and regulatory requirements.

Battery Energy Storage Systems (BESS) are now stepping into this role - not only as a technological enabler but as one of the most dynamic investment opportunities in the energy sector.

From advanced storage solutions to nuclear innovation, learn how technological breakthroughs are paving the way for a more flexible, efficient and sustainable energy future.

The Elektra Energy Storage Project, Sweden's largest battery storage project, is now fully operational. Located in Landskrona, southern Sweden, the project will provide ancillary services to help balance the grid for ...

Our customized battery and energy storage solutions are designed to meet the demanding requirements of this industry. Our products offer robust, high-performance power solutions suitable to power a variety of defence ...

Merus's Energy Storage System is a scalable lithium-ion battery energy storage system fully designed by Merus Power. We provide end-to-end turnkey BESS solutions across the Nordics, working closely with ...

Nordic Batteries designs and manufactures high-power and high-energy battery modules, BMS and BESS products. The company bridges the gap between battery cell manufacturers and system ...

As Nordic countries accelerate their green transition, advanced lithium battery BMS solutions become critical for overcoming environmental challenges while ensuring energy reliability.

Imagine you're a procurement manager for a solar farm in Germany. Your coffee's gone cold while comparing battery management systems (BMS) from six different countries. Suddenly, Finland energy storage BMS ...

This Northern Europe project implements a large-scale containerized energy storage solution to support utility-scale energy storage and grid stability.
