

Photovoltaic Panel Wars

The so-called "solar trade wars" are reshaping the entire industry, determining which countries dominate manufacturing, who pays more for panels, and how quickly renewable energy ...

U.S. trade officials finalized steep tariff levels on most solar cells from Southeast Asia, a key step toward wrapping up a year-old trade case in which American manufacturers accused ...

Consider the U.S., where tariffs on Chinese solar panels have led to increased investment in domestic manufacturing. Yet, these interventions bring their own set of challenges.

President Donald Trump's escalating trade war with China threatens to crimp a massive source of solar panels and parts, with experts saying the cost of projects will certainly rise as China retaliates.

China is actively addressing overcapacity and severe price wars within its solar manufacturing sector, which have led to significant financial losses for major companies.

The U.S. faces off against China in the solar trade war, implementing tariffs to counter China's cheap solar panels and support domestic manufacturing.

Chinese-owned solar companies operating in Southeast Asia -- particularly in Thailand, Vietnam, Malaysia and Cambodia -- are facing potential challenges due to rising US tariffs.

in some cases, creating geopolitical tensions. This report investigates the strategic importance of renewable energy technologies, the impact of current trade policies, the resultant shifts in global supply ...

Factories in China, mostly shut out of the U.S. market for over a decade by high import duties, have been boosting solar panel sales to Asia and Africa, data from energy think-tank Ember ...
