

# Power consumption of Huawei 5g base station equipment

The two figures above show the actual power consumption test results of 5G base stations from different manufacturers, ZTE and HUAWEI, in Guangzhou and Shenzhen, by an anonymous operator.

Today, Huawei will have a new "0 Bit 0 Watt" 5G network base station next month, which could standby at the lowest power consumption of 5W equal to a light bulb.

5G Construction: Energy and EmissionsSmart Functions with 5G Power5G Power Builds A Green Energy GridChina Tower and Huawei conducted joint pilot verification in 2018 and found that the 5G Power solution could support effective 5G site deployment without changing the grid, power distribution or cabinets. This in turn could cut retrofitting costs for a single site by more than US\$1,800, save 4,130 kWh of electricity per site per year. China Tower p...See more on huawei
