

Principle of butterfly solar power generation equipment

Can butterfly wing scales increase solar energy output?

Current solar concentrator technology is expensive and heavy, however. Solar concentrator prototypes lined instead with wing scales from butterflies were found to increase solar panel energy output by over 42%.

What is a butterfly solar concentrator?

The V-shaped design of the butterfly is therefore strikingly similar to the V-trough solar concentrator which uses mirrored side walls to focus light towards a small area of photovoltaic material 3, 26 (Fig. 1d) thereby increasing the output power of any solar cell to which it is attached 4, 27. White butterflies as solar concentrators.

Can biomimicry improve photovoltaic energy harvesting in white butterflies?

Man's harvesting of photovoltaic energy requires the deployment of extensive arrays of solar panels. To improve both the gathering of thermal and photovoltaic energy from the sun we have examined the concept of biomimicry in white butterflies of the family Pieridae.

Could three butterflies make solar panels more efficient?

Will - Sophie Gledhill. So with the power of three butterflies combined, more efficient and more vibrant solar panels could be coming soon to a town near you. Katie's work was carried out with the support of UK Research and Innovation. This work was carried out with the support of UK Research and Innovation.

These capabilities could lead to solar panels that are more adaptive and resilient than current designs. The Broader Impact on Renewable Energy The Broader Impact on Renewable ...

Solar energy output is partly constrained by the area available for panels and the cost of the panels themselves. Solar concentrators use mirrors and lenses to direct sunlight onto electricity ...

We tested the hypothesis that the V-shaped posture of basking white butterflies mimics the V-trough concentrator which is designed to increase solar input to photovoltaic cells.

In the hunt for sustainable energy, solar power has emerged as a front runner for supplying part of the world's energy needs. And Will Tingle has been finding out how three species of ...
