

Pristina electric vehicle adoption

Can extended theory of planned behaviour predict adoption intention of electric vehicles?

Using extended theory of planned behaviour (TPB) to predict adoption intention of electric vehicles in India. Environment, Development and Sustainability. <https://doi:10.1007/s10668-020-00602-7> 21. Shanmugavel, N., Balakrishnan, J. 2023. Influence of pro-environmental behaviour towards behavioural intention of electric vehicles.

Which drivers lead to adopting electric cars?

The findings showed that the main drivers would lead to adopting electric vehicles. In response to the first research question, it is important to note that environmental awareness, user attributes, barriers, and user awareness have a significant effect on the adoption of electric cars, including BEVs, PHEVs, and HEVs.

How can city planners improve EV adoption behavior?

Recognizing the reinforcing and balancing feedback loops in EV adoption behavior allows city planners to make informed decisions that optimize both public and private EV infrastructure, further advancing the transition to sustainable urban mobility. 5.3. Policy implications

What should policy-makers consider when adopting electric vehicles?

Policy-makers must consider the perspectives for future global electric vehicle adoption based on their benefits (e.g., not emitting pollutants, increasing energy security, decreasing fuel price fluctuations, and better performance). Various recommendations can be made to policy-makers.
