

Romania container solar panel flat roof house

Which Romanian roof provides energy for an entire house?

The first FALT SOLAR roof in Romania, which provides energy for an entire house, has been installed in Paulesti, Prahova County. FALT SOLAR is a roof with integrated photovoltaic cells and belongs to the BIPV (Building Integrated Photovoltaics) category.

How is Romania supporting rooftop solar?

Romania supports rooftop solar installations through the Casa Verde Fotovoltaice (green PV home) scheme, which is part of the national net metering regime. According to the latest statistics from the International Renewable Energy Agency, Romania had 1.39 GW of solar installed by the end of 2020. Romania is also promoting rooftop PV deployment.

Why did Metigla launch a solar roof in Romania?

The launch in Romania of FALT SOLAR, the roof with integrated photovoltaic cells, is a natural step in line with Metigla's mission to cover the well-being of people and businesses with smart, sustainable, and innovative solutions.
