

Rooftop photovoltaic support policy

In light of a recent increase in consumer complaints about rooftop solar sales and installations, this issue brief lists some of the reported problems and consumer risks of rooftop solar ...

For more information about rooftop solar power and the policies that help it to thrive, as well as detailed sources and methodology for the data presented above, please click on the full ...

As described above, some lenders charge hidden fees when financing solar rooftop systems by marking up the cash price by 25% or more. These are called hidden "dealer fees."

Modern building codes and regulations increasingly view rooftops as valuable real estate for renewable energy generation. From California's pioneering solar roof mandate to innovative ...

Explore research on how supportive policy allows rooftop solar to meet local energy needs, create jobs, and support electric grid reliability.

State and local policies that make it easier for homeowners and business owners to install and connect solar energy systems, and that compensate them fairly for the electricity they generate, can ensure ...

States and utilities have various and changing policies, incentives, and compensation mechanisms for BTM energy storage and rooftop solar which can be difficult to navigate.

To meet set-aside mandates, utilities need to either own solar energy installations or acquire SRECs from retail customers who install rooftop solar. Therefore, SRECs can provide a ...

Environment America made a series of policy recommendations for states and local governments to help tap the massive potential of U.S. rooftops in a recent report. First, it ...

Rooftop potential is not equivalent to the economic or market potential for rooftop solar--it doesn't consider availability or cost. Rather, it is the upper limit of solar deployment on rooftops across the ...
