

Rural Microgrid Case Sharing Session

Can We design microgrids in rural communities?

A vast majority of the energy access programs currently underway are in developing countries with limited access to the latest information and state-of-the-art technology. This paper serves as a link between scientific advancements and field-proven best-practices for designing microgrids in rural communities.

Is a microgrid right for your community?

ural sites, and community preferences. If fishing is integral to the community, avoid a hydro system that has a significant impact on marine life.
