

Senegal 100MW energy storage project

Described as a first for West Africa, a solar PV installation with battery storage project dedicated to frequency regulation has been commissioned in Senegal.

With the launch of Walo Storage, Senegal's energy sector enters a new era of sustainable solar power and reliability.

Senegal has officially inaugurated the "Walo Storage" plant in Bokhol (Saint-Louis Region) on January 22, 2026. This marks a technological milestone as West Africa's first large-scale ...

The project aims to enhance grid reliability, expand clean energy access and support Senegal's sustainable energy transition. Construction on the project began in May 2025, with ...

The on-time commissioning of Walo Storage demonstrates our ability to support Senegal's energy transition using cutting-edge technology. It is also a key milestone in our ambition to build ...

Independent power producer Africa REN has commissioned a solar-plus-storage project in Senegal. The Walo Storage project is the first solar installation in West Africa to include energy...

The nation's commitment to sustainable development and renewable energy sources has led to the establishment of a pioneering hybrid energy facility in northern Senegal, marking a ...

Senelec and TotalEnergies Launch the Senegal solar plant in Thiès; Senegal has taken a monumental step forward in its renewable energy journey with the official launch of a new 100 MW ...

The project will increase the current spinning reserve by 40% and will provide additional services such as frequency control, island functioning and Black-Start capability. Battery storage is technically and ...

Senegal has begun commercial operations at a new solar energy facility that combines photovoltaic power with lithium-ion battery storage, the first of its kind in West Africa, as the country ...
