

Sludge layer is used as photovoltaic support foundation Phc pile

Is a PHC pile foundation a reliable support structure for heliostats?

A comprehensive design program is proposed based on field tests and numerical simulations, considering deformation and bearing capacity. The study confirms the reliability of the PHC pile foundation as a support structure for heliostats, aiming to offer valuable insights for practical applications.

Can a photovoltaic bracket pile foundation meet different bearing capacity requirements?

Therefore, this paper aims to investigate the application of bionics principles to propose a novel type of photovoltaic bracket pile foundation designed to meet diverse bearing capacity requirements, specifically suited for desert gravel areas: the photovoltaic bracket serpentine pile foundation.

What is a PHC (pre-stressed high-strength concrete) pile foundation?

The PHC (pre-stressed high-strength concrete) pile foundation, serving as an innovative supporting structure for solar power stations, is subjected to complex loading conditions in engineering scenarios.

What is a PV racking pile foundation?

As the primary load-bearing element of the photovoltaic power generation system, the PV racking pile foundation not only supports the system's own weight and external loads, but also constitutes a significant portion of the total construction cost due to the extensive quantity used [10,11].

To address these challenges, this paper introduces a new type of PV bracket pile foundation based on the principles of bionics--the precast concrete serpentine pile foundation for PV ...
