

Solar inverter maiden voyage

We walk you through each step of the install--from massive copper wire connections to solar panels on the roof--and then take the upgraded Pelicruiser on its maiden off-grid voyage: boondocking...

I installed a small 10w solar panel on the lid of the propane tank. If you are storing indoors, that won't help any. If you do need to replace, consider upgrading to AGM for the hassle free ...

Photovoltaic grid-connected inverters and energy storage inverters were unveiled and the site received much attention. With the continual recognition of the maiden voyage brand in Vietnam and other ...

On our maiden voyage the battery was at 100% and we were plugged into shore power at the park. Every morning, I would find that the battery was down to somewhere between 75% and ...

I have a 2011 Thor Freedom Elite 21C, and this past weekend we took our maiden voyage, ultimately, I think it was a resounding success, at least until this morning.

Solar controller is back on. Batteries up this morning. First time I have seen the controller off. Sometimes flashes blue during the night. Looked through all of my Rt literature

Friday: About 1:30 PM, I turned everything on. Inverter, water heater, DC Fridge, Furnace set to 70 degrees. Arrived about 6:30pm. Batteries were at 100% the entire travel time, as expected, ...

After a total of about 9 hours on battery power, the inverter went into standby mode and unable to get it out. Soft reset the inverter and was able to turn on the inverter.

If your fridge isn't working off the inverter, make sure it is plugged in. The outlet center for the inverter is under the bottom drawer under the range. Ours cools instantly on the inverter. It is not ...

My new to me 2014 R27 Classic had some new solar and Lithium installed, 900AH of capacity with a couple new solar panels. Here's a Video of some of the process.
