

Solar panel BESS prices in Georgia

How much do solar panels cost in Georgia?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Georgia homeowner needs a 12.35 kW solar panel system to cover their electricity needs, which comes out to \$31,703 before incentives. Prices range from \$26,948 to \$36,458, but after the federal tax credit, that drops by 30%.

What tax credits do solar panels get in Georgia?

The federal solar investment tax credit (ITC) is the biggest factor reducing the cost of going solar in Georgia. If you install a residential solar panel system by the end of 2032, you receive a federal income tax credit equal to 30% of the system's total cost. That includes equipment, labor and permits.

Should you buy a solar battery in Georgia?

You can store free solar energy for use when your panels stop producing, maximizing your savings over time. This is particularly beneficial in areas with higher energy costs, like Atlanta. Batteries also let you maintain power through blackouts, which are common in Georgia due to the extreme weather.

How much do solar panels cost?

The cost of solar panels in Georgia is currently lower than the average price of \$3.00 per watt across the United States for residential solar power systems. The size of a solar panel system affects the installation cost, with larger installations having a lower cost per watt due to 'bulk pricing'.

Learn about Georgia's 2025 solar panel costs, with rates around \$3.52 per watt and a 5 kW system costing about \$12,635.00 after tax credits.
