

Solar power all-in-one home appliance

Why should you use solar for appliances?

Here are a few reasons why everyone should consider using solar for appliances. Solar power is a sustainable solution that does not impact the environment adversely. With solar power helping your appliances run, you do not have to bother about power cuts. When several people use solar power, the pressure on electric grids decreases.

Why should you choose solar power for your home?

With solar power helping your appliances run, you do not have to bother about power cuts. When several people use solar power, the pressure on electric grids decreases. Solar energy is free. So, once you pay for the solar panel and its installation, you are done with the expenditure part.

How much energy does a solar oven use?

However, instead of using electricity to run the oven, if you use solar power, the energy consumption will go down. Generally, ovens consume between 1KWh and 4KWh of energy based on duration and temperature setting. Switching to solar power for appliances such as ovens that require higher energy makes your home energy-efficient.

How many solar panels do I Need?

The number of panels you need to install for your home appliances depends on usage requirements. The number of appliances to be attached to the solar panels and their consumption capacities can be critical here. A household with 1 solar power AC will require a lesser number of panels than a home with 4 ACs.
