

# Solar power companies profits fall

Wonder why so many solar companies fail? Discover the main challenges behind their struggles and closures.

China's PV industry posted sharp declines in upstream production and profit margins in the first half of 2025, even as domestic installations reached record highs and new export markets...

There wasn't a lot of positive news in 2023 for the solar energy industry. Rising interest rates, higher labor costs, and regulatory changes all hit the industry hard, sending stocks lower...

Major residential solar businesses have gone bankrupt. Which strategies work, and which ones fail?

U.S. residential solar companies are preparing for a steep drop in business this year after the expiration of a federal tax credit that helped drive more than a decade of rapid growth, prompting ...

The average power prices earned by solar projects in 2024 dropped by more than 50% compared to 2023, which has reduced the economic viability of new projects. Additionally, state ...

Although solar energy consumption continues to grow, much of the solar energy market suffered from layoffs, lack of profits and industry turmoil throughout 2024. And more solar industry job ...

After several years of 30 percent annual growth in installations, 2024 saw a decline: fewer panels were installed in many markets, and companies' valuations declined. This led to large capital ...

The US residential-solar industry is under serious threat -- a vulnerability borne out this week by the bankruptcy of SunPower Corp., one of the sector's most venerable names.

“But as rates climbed in recent years, the cost of borrowing money skyrocketed, shrinking profit margins for solar companies reliant on financing.
