

How much photovoltaic power is installed in Spain in 2022?

7. According to data from Appa Renovables' annual photovoltaic self-consumption report, in 2022, 2,649 MW of new photovoltaic power was installed in Spain in self-consumption facilities.

How is Spain promoting self-consumption of solar energy?

The Spanish government has taken significant steps to promote self-consumption of solar energy, including the approval of a road map with over thirty measures aimed at facilitating its deployment and eliminating barriers.

Why are energy communities increasing in Spain?

The number of energy communities that produce electricity has increased throughout Spain (291 the 4th December 2023), due basically to self-consumption subsidies and the initiative of groups of pioneering individuals, but not because of a stable regulatory framework, which is still lacking.

How far is a rooftop solar system from a building?

In 2022, the Government increased the distance to 2 km for rooftop solar, after receiving strong criticism for the 500m limit. It also approved a modification of the Horizontal Property Law that simplified the required majority for approval of solar PV installations in buildings.

Discover how rooftops in Spain can become solar energy sources. Boost savings, reduce emissions, and achieve energy independence with solar self-consumption.

Spanish households and firms installed fewer rooftop solar power systems in the first quarter of the year compared with the same period last year, solar industry group UNEF said on Tuesday. Installed ...

Battery energy storage systems are rising in Spain's rooftop solar market, with C& I demand growing despite an overall dip in installation volumes.

Spain's recent blackout highlighted a surprising reality for many rooftop solar panel owners: despite their investment in renewable energy, they were not immune to power outages. This ...

In response to the European Commission's renewable energy targets for 2030, this study presents a comprehensive, data-driven evaluation of the potential for electricity self-consumption in ...

Spain installed 1,182 MW of new rooftop PV systems last year, according to Spanish solar energy association UNEF. This brought the country's total rooftop PV capacity to 8.137 MW by ...

Spain Rooftop Solar Market Summary: The Spain rooftop solar market was valued at USD 2.74 Billion in 2025 and is projected to reach USD 13.95 Billion by 2034, expanding at a compound annual growth ...

Spain's rooftop solar segment is showing signs of resilience, with installations rising 11% in Q2 2025 compared to the first quarter, according to data from the Spanish Photovoltaic Association (UNEF).

Spanish rooftop solar power

Scoring System This country profile highlights the good and the bad policies and practices of solar rooftop PV development within Spain. It examines and scores six key areas: ...

According to data from the Spanish Photovoltaic Association (UNEF), Spain's rooftop solar installed capacity reached 9.3 GW by the end of 2025, with 1,139 MW of new capacity added, a 3.7% ...
