

The largest wind turbine blade

SANY Renewable Energy, a wind turbine manufacturer in China, has built the world's longest onshore wind turbine blade. The SY1310A is 430 feet (131 meters) long and rolled off the ...

China's Sany Renewable Energy claims it has just erected the world's largest onshore wind turbine. The 15-MW prototype features 430-ft-long blades, making for a maximum swept area of...

These massive blades are destined for installation on what is expected to be the world's most powerful offshore wind turbine, a 26-megawatt (MW) unit being developed by Dongfang Electric...

China's wind turbine manufacturing giant, SANY Renewable Energy, has recently developed the world's largest onshore wind turbine blades. At a length of 430 feet, the SY1310A ...

According to The United States Department of Energy, most modern land-based wind turbines have blades of over 170 feet (52 meters). This means that their total rotor diameter is longer ...

Sany Renewable Energy, a Chinese wind turbine manufacturer, has built the world's longest onshore wind turbine blade, the SY1310A, which is 430 feet (131 meters) long.

The world's largest-ever onshore wind turbine blades have been manufactured in China. At 131 metres in length, each foil would dwarf Big Ben or the Statue of Liberty.

SANY Renewable Energy, a prominent Chinese company, has achieved a monumental feat in renewable energy technology by unveiling the world's largest-ever onshore wind turbine blades.

? The 153 meters of the largest wind turbine blade in the world, put to the test Dongfang Electric (DEC) has unveiled the largest wind turbine blade ever manufactured worldwide.

Today we are thrilled to announce that we have produced the world's largest wind turbine blade - the first blade to surpass 100 meters in length. The 107-meter blade has completed the molding process ...
