

# The photovoltaic energy storage sector continues to be active

The solar energy storage industry is expected to witness tremendous growth, led by growing environmental awareness and strict emission reduction policies. The growing focus on energy ...

As new development opportunities for traditional community solar continue to decline, community solar developers report increased interest in exploring community-scale solar and storage ...

Despite tariffs and interconnection issues in the supply chain, the US energy storage market is still seeing record-breaking growth.

The energy storage sector maintained its upward trajectory in 2024, with estimates indicating that global energy storage installations rose by more than 75%, measured by megawatt-hours (MWh), year-over ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024 ...

In this blog, we'll cover what is driving the unprecedented growth of the energy storage sector, address challenges the industry needs to navigate, and show how energy storage unlocks ...

In this blog, we'll cover what is driving the unprecedented growth ...

The utility-scale segment is expected to grow 22% YoY in 2025. As the market evolves, continued innovation, supportive policies, and strategic planning will be crucial to navigate the ...

The U.S. utility-scale energy storage market led the way, adding 1.5 GW/4 GWh of capacity in Q1 2025 for a 57% increase over the same period last year. The residential storage ...

o Since Ivanpah was installed, all CSP tower plants installed globally have included storage, using molten salt or other non -water thermal energy storage media.

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, the sector ...
