

Timor-Leste Solar Energy Storage Project

Small community-level renewable energy projects have been underway in rural areas, but this project is the nation's first major utility-scale solar and storage development - with 72 MW of solar PV and a 36 ...

DLA Piper advised Eletricidade de Timor-Leste on its first utility-scale solar PV and battery storage project with a 100MW capacity, marking a major milestone in the country's renewable energy ...

The visit provided an opportunity to directly observe the installation of a hybrid photovoltaic (solar) system - a critical development designed to ensure reliable, round-the-clock ...

The construction of the solar power plant is a key component of East Timor's strategy to diversify its energy sources. The country has been heavily reliant on fossil fuels, but this new ...

East Timor to build its first 72 MW solar plant with 36 MW storage in 2026, reducing diesel reliance and advancing clean, affordable energy access.

The landmark project includes drafting and negotiating a power purchase agreement (PPA) and an implementation agreement with the Ministry of Finance, marking a significant step in ...

It delivers immediate cost savings, supports the government's efforts to rationalize subsidies, and lays the groundwork for a diversified energy mix that can support economic growth ...

In a landmark moment for Timor-Leste's energy future, a Power Purchase Agreement (PPA) has been officially signed for the country's first-ever solar power project integrated with a Battery...

The Project involves the construction and 25-year operation of a new power plant in Manatuto, Timor-Leste, comprising a 72 MW solar power plant co-located with a 36 MW/36 MWh ...

EDTL has invited, through an international public tender, proposals for the development of the Project by independent power producer ("IPP"). Once selected, the IPP is expected to establish a special ...
