

Tips for using photovoltaic panels at home

How do I choose the best way to use solar electricity?

Before deciding on the best way to use solar electricity at home, assess the potential solar energy that can be produced at your address. Because PV technologies use both direct and scattered sunlight to create electricity, the solar resource across the United States is ample for home solar electric systems.

How do I choose a solar PV system?

Weather Conditions: In areas with frequent snowfall, rainfall, or strong winds, ensure that solar PV panels are securely installed and have features that allow rainwater and snowmelt to flow off automatically. **3. Lightning Protection:** Solar PV panels installed on rooftops or outdoors should have lightning protection measures in place.

Where to install solar photovoltaic panels?

For villa-type homes, the rooftop and surrounding open space usually belong to the private property of the family. Therefore, solar photovoltaic panels can be installed on the rooftop or in the open space in front of the house facing the optimal direction.

How do I Go Solar for my home?

The most common way to go solar for homeowners is the installation of panels on their roofs. These systems can be purchased directly through an installer (or assembled for the DIYers) as a large cash purchase or through relatively affordable financing (such as a 1.99% APR 15-year loan).
