

# Uninterruptible power supply for the bar

What is an uninterruptible power supply (UPS)?

Uninterruptible power supplies (UPS) are essential to ensure you have continuous power during a power outage. From a small UPS to save and shut down your PC, to large commercial systems that power large data centers or critical systems in hospitals, we have the solutions you and your customers demand.

Why are uninterruptible power supplies important?

Uninterruptible power supplies are essential devices for anyone looking to protect their valuable electronics and maintain seamless operation during power fluctuations. These reliable power solutions ensure that your computers, appliances, and other critical equipment stay powered even in the event of unexpected outages or voltage drops.

Does uninterruptible power supply USP provide surge protection?

Many models of uninterruptible power supply USP also provide surge protection. A surge protector blocks spikes in voltage so that they do not harm your electronics. So, your battery backup is always at work, protecting your desktop computer, network equipment, or other electronic equipment and charging its battery when not in use.
