

Uninterruptible power supply unit in basement

A UPS, or a uninterruptible power supply, is a device used to backup a power supply to prevent devices and systems from power supply problems, such as a power failure or lightning strikes.

An uninterruptible power supply (UPS) or uninterruptible power source is an electrical apparatus that provides emergency power to a load when the input power source or mains power fails.

Vital Power offers a range of UPS installation services, and can help choose the perfect location. UPS rooms will also need to be well-ventilated and kept clean and free from debris.
