

Vatican solar-powered communication cabinet battery construction project

Italy has agreed to a Vatican plan to turn a 430-hectare (1,000-acre) plot of land north of Rome into a vast solar farm that will generate enough electricity to meet the needs of Vatican City.

The project aims to meet the full energy needs of both the Vatican State and Vatican Radio using solar technology integrated with agricultural activity.

The Vatican's solar shift is a culmination of a political and spiritual mission years in the making. In 2024, the late Pope Francis issued an apostolic letter ordering the construction of an agrivoltaic solar ...

This article explores how battery technology supports the Vatican's sustainability goals while offering insights into broader applications for religious institutions and urban microgrids.

Discover how the Vatican's groundbreaking solar initiative combines faith with renewable energy innovation - and what it means for global sustainability efforts.

ROME (CNS) -- Almost a year after Pope Francis set up a commission to develop a large solar-panel array on Vatican property outside of Rome, Pope Leo XIV visited the site and the Vatican ...

Thanks to our detailed planning and implementation of the project, the successful installation of the solar system on the roof of the Nervi Hall demonstrates how leading-edge technology can be efficiently ...

As part of his visit to Santa Maria di Galeria, a Vatican extra territory outside of Rome, Leo had the opportunity to examine the project site being studied for an "agrivoltaic system" for ...

Part of Pope Francis' dream was to ensure the city state in Rome ran on green energy. An agrivoltaic plant on Vatican property is the result.
