

Will Sudan Communications be allocated a base station

In western Sudan and remote regions including Darfur and Kordofan, functional telecommunications infrastructure is largely non-existent, and organizations cannot rely on private ISP contracts.

Since the outbreak of conflict, Sudan's national communications infrastructure has been impacted by direct damage to telecommunications towers and a deteriorated national power grid ...

Following the establishment of Sudan's transitional government in August 2019, government-owned broadcasters became increasingly independent from government and military control.

While some levels of services were restored in the east of the country, large swathes of territory remain disconnected from the network providers, such as Zain, MTN and Sudani - namely ...

In opposition to the official broadcast network, the Sudan People's Liberation Army operated its own clandestine radio station, Radio SPLA, from secret transmitters within the country and facilities in ...

Despite many development plans and efforts, the state of telecommunication sector in the country remained extremely poor through 1994. At that time, Sudan had one of the lowest penetration rates ...

"We are very excited to deploy Intracom Telecom's ultra-broadband FWA solution WiBAS(TM) in Sudan," said Elrashied Abdalla Mahmoud, Maxnet general manager. "WiBAS(TM) has enabled Maxnet to ...
